

## ORACLE INVENTORY

### COURSE DESCRIPTION

Duration	2 – 3 Days
Delivery Method	Instructor-led
Materials	Student workbook

This course, developed for persons experienced in the inventory management process teaches participants to use the most common functions of Oracle Cash Management. A hands-on course, participants are led through the inventory process including the creation and maintenance of inventory items, physical inventory transactions such as cycle counting, issue and receipt transactions, transfers and moves and reporting. A detailed discussion of the interaction between Oracle Inventory and other modules such as Order Management, BOM will be held. Hands-on practices include creating inventory items, issuances and receipts, transfers and maintenance and reporting.
